GENERAL INFORMATION PERTAINING TO WATER RIGHTS IN CALIFORNIA  
There are two principal types of surface water rights in California. They are riparian and appropriative rights.

A riparian right enables an owner of land bordering a natural lake or stream to take and use water on his riparian land. Riparian land must be in the same watershed as the water source and must never have been severed from the sources of supply by an intervening parcel without reservation of the riparian right to the severed parcel. Generally, a riparian water user must share the water supply with other riparian users. Riparian rights may be used to divert the natural flow of a stream but may not be used to store water for later use or to divert water which originates in a different watershed, water previously stored by others, return flows from use of groundwater, or other "foreign" water to the natural stream system.

An appropriative right is required for use of water on non-riparian land and for storage of water. Generally, appropriative rights may be exercised only when there is a surplus not needed by riparian water users. After the formation of the California Water Commission back on December 19, 1914, new appropriators have been required to obtain a permit and license from the State. Appropriative rights can be granted to waters "foreign" to the natural stream system.

Statements of Water Diversion and Use must be filed by riparian and pre-1914 appropriative water users as set forth in Water Code section 5100 with specific exceptions. The filing of a statement (1) provides a record of water use, (2) enables the State to notify such users if someone proposes a new appropriation upstream from their diversions, and (3) assists the State to determine if additional water is available for future appropriators.

The above discussion is provided for general information. For more specific information concerning water rights, please contact an attorney or write to this office. We have several pamphlets available. They include: (1) Statements of Water Diversion and Use, (2) Information Pertaining to Water Rights in California, and (3) Appropriation of Water in California.

RE: Supplemental Statement of Water Diversion and Use Statement  
No. 1082

Dear Mr. Rowlands,

Enclosed is the Supplemental Statement of Water Diversion and Use for the years 1991, 1992 and 1993, Statement No. 001082. The following information should be considered when reviewing the report.

P&M Cedar Products, Inc. became the Diverter of Record for the above-referenced Supplemental Statement of Water Diversion and Use from Champion Building Products, a subsidiary or division of Champion International Corporation, on July 24, 1993. As yet, P&M has not implemented a method for determining the quantities of water diverted. Efforts to do so have commenced to enable P&M to supply such information in the next report.

P&M Cedar Products, Inc. has, at all times since taking the assignment, used the water only for industrial purposes at it's McCloud mill site. P&M has never put any water to agricultural use for stock watering, irrigation, or any related purpose, nor has P&M entered into any obligations to furnish water to any party for such uses.

P&M bases the information in the enclosed report for periods prior to July, 1993 solely on information provided by its predecessor in interest.

If you have any questions, or need further information please contact me at (916) 378-7650. Thank you very much.

Sincerely,

David Waters
